Ciudad de Mar City Hall of Las Palmas de Gran Canaria proceeds these days to remove excess aggregates accumulated at the bottom of the natural pools of La Laja Beach by the usual coastal dynamics. The works that began in the early hours of this morning, Thursday, May 17, will continue until Friday morning. The City Council has proceeded to close the access while the work is being carried out for security reasons. The pools will be available again to the public over the weekend.

The councilman of Ciudad de Mar, José Eduardo Ramírez, explained that the dredging takes place these days taking advantage of the fact that it is a time of low citizen occupation "to avoid inconveniences and inconveniences to the habitual users. The works will be finished tomorrow, Friday. It is working quickly and efficiently to recover the optimal state of this leisure equipment citizen facing the season with more influx of the year, the summer.

The works, authorized by the Demarcation of Coasts, are carried out with articulated arm backhoe loaders and a loader that allows to act on the bottom from the ends of the pools. The last removal of aggregates in the pools took place last November.

Swimming pools of La Laja

The north pool has an approximate surface area of 423 square meters and a maximum depth of 1.5 meters. The central, rectangular pool of about 600 square meters and a depth of 2.75 meters and the South pool has 252 square meters and a maximum depth of 1 meter.
